

TECH-KIT Marine Electrical Installation & Repair Kit

Handy kit for use on the electrical systems of Boats, RVs, Trailers, and Campers. The EX623 Clamp meter tests generators, alternators and includes a built-in non-contact AC Voltage Detector. Locate 'hot spots' with its IR Thermometer function on engines, hoses, radiators, and electrical systems. The EX505 MultiMeter features dual sensitivity frequency functions for both electrical and electronic testing. The CT20 is a continuity tester that assists in trouble-shooting or installing wiring systems. Use the LED-illuminated inspection borescope to look in hard-to-reach areas. Kit comes with professional tool bag that provides protection and organization for tools and accessories.

KIT Includes:

EX623 — 5-in-1 AC/DC Clamp Meter

- True RMS measurements for accurate AC Voltage and Current measurements
- Dual type K thermocouple input with Differential Temperature function (T1, T2, T1-T2)
- Built-in non-contact IR Thermometer with laser pointer for locating hot spots (up to 518°F/270°C)
- Built-in non-contact Voltage detector with LED alert

EX505 CAT IV True RMS Industrial Multimeter

- Rugged waterproof (IP67) and drop proof (6ft) design
- Functions include: AC/DC Voltage & Current, Resistance, Continuity, Diode Test, Capacitance, Type K Temperature and Duty Cycle

CT20 — Remote and Local Continuity Tester

- Flashing LED/loud beeper indicate local continuity
- Probe detects continuity and polarity in remote location
- Flashing remote probe - two lead, bi-color (red/green) LED probe allows a single user to identify up to three wires or cables at a time

BR80 — Video Borescope Inspection Camera

- 17mm diameter camera head with 39" (1m) flexible gooseneck cable retains configured shape
- Mini water-proof (IP67) camera head and cable
- Four bright LED lamps with dimmer
- 2.4" (61mm) color LCD monitor & 180° image rotation feature

BRC-EXT — 1m extension cable for BR80

- Increases viewing depth; maximum two extension cables can be connected to the borescope

CA-EXTECHTB — Professional Tool Bag

- Protects and organizes your tools and accessories with multiple internal and external pockets
- Designed with rubberized bottom and heavy duty fabric
- Comfortable adjustable shoulder strap
